Experience

SDE Intern **May — July 2025**
Algoleap Technologies Pvt. Ltd. | *Certificate* *Hyderabad*

- Monitored API performance and error rates across staging and production environments, using log-based triage to identify and resolve rate-limit failures, contributing to a 30% drop in integration incidents.
- Eliminated the need for 4 separate API keys by designing a single consistent GenAI interface.

Intern **Dec 2024 — Jan 2025**
Indian Association for the Cultivation of Science | *Certificate* | *Website* *Kolkata*

- Boosted departmental operational efficiency by 40% by architecting and shipping a login-secured Store Inventory Job Card Portal for end-to-end job card tracking.
- Processed 8,000+ applications with zero downtime by designing a scalable platform architecture.

Skills, Technologies and Certifications

Languages	HTML, CSS, JavaScript, Bootstrap, Java, Python, SQL
Databases	MySQL, PostgreSQL, Redis, QdrantDB, MongoDB, Supabase
Core CS Fundamentals	Object-Oriented Programming, Design Patterns, Operating Systems, Computer Networks, Database Management Systems
Frameworks & Architecture	Node.js, Express.js, REST API Design, Unit Testing
Cloud & Infrastructure	AWS, Docker, CI/CD
Certifications	AWS Certified Developer - Associate, AWS Certified Solutions Architect - Associate, AWS Certified Cloud Practitioner
Generative AI & Tools	Prompt Engineering, RAG, Agentic AI, Git/GitHub, Agile/Scrum

Projects

LiveLingo | Node.js, Express.js, AWS Interactive Video Service, AWS Cloud Watch, Gemini Flash 3.1 Live **Github**

- Architected a fault-tolerant, low-latency streaming system handling continuous 20ms PCM audio chunks under constrained network conditions (350 Kbps), designing middleware to absorb TCP Head-of-Line blocking spikes (17.3s) without dropping the pipeline.
- Deployed the pipeline as a multi-tenant SaaS service, integrating AWS IVS with a translation layer and using AWS CloudWatch to monitor latency and error rates — sustaining sub-400ms end-to-end response under constrained network conditions.

Validex | Node.js, Express.js, Azure Maps, Azure OCR, Twilio, Langgraph **Github | Website | Demo Video**

- Built an agentic AI system using LangGraph-based multi-agent orchestration for healthcare data validation, reducing manual verification workloads by 80-90% — processing 100 provider records in under 5 minutes with 85%+ extraction accuracy from unstructured PDFs.
- Optimized data lookup/matching logic to improve pipeline throughput at scale using workflow orchestration; Selected for EY Techathon 6.0 Semi Finale 2026 (Certificate)

Conference Management Toolkit | Node.js, Express.js, Bootstrap, AWS EC2, RDS, ElastiCache, SES, SQS **Github | Website**

- Deployed a modular, role-based server architecture on AWS EC2 with RDS and Redis, supporting 100+ concurrent users at 99.9% uptime — automating the review lifecycle and cutting manual admin processing time by 40%.

Publications

A System and Method for Voice-Driven Semantic Image Search Leveraging AWS and OpenAI *Accepted for presentation and publication, IEEE INCECT 2026 (Aug 21–22, 2026)*

Achievements

Honorable Mention, *Bangkok University x Berkeley SkyDeck Fund Hackathon 2026* [Certificate]
Best AI Model, *Yantra Central Hackathon 2025, VIT Vellore* [Certificate]
Winner, *Aquathon 2024 (Technical Hackathon organized on World Water Day), VIT Vellore* [Certificate]

Education

Bachelor of Technology in Computer Science & Engineering, *Vellore Institute of Technology, Vellore*
CGPA: 8.43 / 10.00 2023 - 2027
